</table>

**Established Discussions** - Normally scheduled discussions in three possible formats to cover key content areas
- Discussion with prompt
- Webinar
- Presentation with breakout and recap

**Bonus Discussions** - There are two built in methods for attendee interests to be addressed on an ongoing basis
- Bike Rack Space - topics for these sessions will be based on members up-voting from a live topic list. These will alternate between advanced and entry-level topics.
- Repeat Discussion - "Established" sessions which will run again because they are in high demand

**Market Opportunity Mondays** - Sponsored: Sponsors will address the challenges in the renewable energy market and present new market solutions available to buyers.

Tuesday, May 5:

12:00 PM – Welcome Celebration & Virtual Summit Kickoff
REBA CEO, Miranda Ballentine and REBA Board Chair, Michael Terrell, Director of Operations and Head of Energy Market Strategy at Google, welcome you to REBA Connect Virtual Member Summit and celebrate year one of REBA. Join this session to hear directly from REBA’s key leadership and how far we have come with YOUR support.

12:30 PM – 2021 Cohost Welcome
The 2021 Spring REBA Member Summit cohosts welcome you to the Virtual Member Summit. Cohosts: Mark Basset, Chairman & CEO of Hemlock Semiconductors & Dane Parker, CSO of General Motors

1:00 PM – State of the Market
Learn about the key market trends of 2019 and the emerging trends of 2020 from REBA CEO, Miranda Ballentine and Manager of Education & Engagement, Alex Klonick. The REBA State of the Market is always filled with insights that are unique to REBA and emerging trends ready for leadership. Join us for exclusives on the WHO, WHAT, WHERE, and HOW of renewable energy procurement in the market.
Tuesday, May 5 Continued:

1:30 PM – Track Primers Release
Get up to speed on the market issues and dig into the central themes of two tracks that will run through all Virtual Summing convenings. These 101-level Primers will build concept understanding and serve as the basis for conversation through the summer.

2:00 PM – 2021 COVID-19 Market Impact Update
An important addition to the State of the Market, this session will dig into the energy market impacts of COVID-19. Please join REBA CEO, Miranda Ballentine and Director of Supply Chain and International Collaboration, Mark Porter as they present anecdotal and quantitative insights on how COVID-19 has impacted REBA members and where the trends are heading in the future.
Week One: May 5 – 7

Wednesday, May 6:

10:00 AM-12:00 PM – Buyers Fundamentals Run 1
Meet your Buyer member peers in the REBA community and get up to speed on basics of the energy market.
Speaker: Alex Klonick, Manager of Education & Engagement

1:00-3:00 PM – Buyers Fundamentals Run 2
Meet your Buyer member peers in the REBA community and get up to speed on basics of the energy market.
Speaker: Alex Klonick, Manager of Education & Engagement

Thursday, May 7:

4:30-5:30 PM – Happy Hour Mixer
Mix and mingle with the community as REBA facilitates connections.
Monday, May 11:

2:00-3:30 PM – State of the Market Q&A
Dig deeper into the State of the Market with content specialists.

Speakers: Miranda Ballentine, CEO, REBA; Alex Klonick, Manager of Education & Engagement, REBA; Mark Porter, Director, Supply Chain & International Collaboration, REBA; Bryn Baker, Director, Policy Innovation, REBA; Priya Barua, Deputy Director, Market Innovation & Utility Engagement, REBA

Tuesday, May 12:

2:00-3:30 PM – Renewable Landscape and Strategy Track Primer and Q&A
Get up to speed on three broad market topics (Tracks) with insight from market-leading Track Guides.

Speakers: Josh Kaplan, Manager, Education and Engagement, REBA; Erin Decker, Director, Cleantech Client Management, Schneider Electric; Max Scher, Head of Clean Energy and Carbon Programs, Salesforce; Peter Lundquist, Executive Director, Business Development, CMS Enterprises
Week Two: May 11-14

Wednesday, May 13:

2:00-3:30 PM – Expanding Future Procurement Options Track Primer and Q&A
Get up to speed on three broad market topics (Tracks) with insight from market-leading Track Guides.

Speakers: Bryn Baker, Director, Policy Innovation, REBA; Priya Barua, Deputy Director, Market Innovation & Utility Engagement, REBA; Steve Chriss, Director Energy Services, Walmart; Caroline Golin PhD. Senior Regulatory Policy Lead, Google, Erin Craig, VP Energy and Climate Practice, 3Degrees

Thursday, May 14:

12:00-1:30 PM – Powering the Supply Chain Track Primer and Q&A
Get up to speed on three broad market topics (Tracks) with insight from market-leading Track Guides.

Speakers: Mark Porter, Director, Supply Chain & International Collaboration, REBA; Phil Rausch, Business Development Manager, Hemlock Semiconductor

2:00-4:30 PM – Buyers-Only Afternoon
Connect with your peers in the Buyer community.
Tuesday, May 19

2:00 PM – How are data centers changing their energy direction course with renewable energy options and efficient infrastructure?
Discuss the current renewable energy options for data centers and the positive impact they have on operations, sustainability, and a lower total cost of ownership.

Speakers: Phill Lawson-Shanks, Chief Innovation Officer, Aligned
Session Format: Discussion with Prompt

Register Now!
• Register for sessions here: https://cvent.me/0I9RL1 and be sure to register even if there is a waitlist. Seats will be opened as the session approaches. Please only register for capped sessions if your intent is to attend, otherwise you are taking someone else's seat. Repeated absences to capped sessions will result in your remaining registrations being moved to the waitlist.
• This Schedule at a Glance is a static document and will not be updated during the summit, for the most up to date information, please go to the event platform: https://rebaconnect.psa.vlive.
Thursday, May 21

11:00 AM – What are the benefits and challenges of incorporating storage into a solar VPPA?

More and more developers are integrating energy storage with renewable projects, producing so-called "hybrid projects" that, for tax reasons, are usually solar + storage configurations. Corporate procurement involving energy storage is fairly new, but some transactions have now been completed that include a storage component. Storage can be used to manage electricity costs and revenues, in effect allowing the corporate VPPA to settle stored electricity at a higher market price. The discussion would address the benefits and challenges of using energy storage in connection with corporate procurement, including use cases for energy storage structural limits imposed by the investment tax credit that is used to support solar + storage. We recently advised one of our clients in connection with a completed VPPA solar + storage transactions and would ask to have them join the discussion.

Speakers: William H. Homes, Partner, K&L Gates LLP
Session Format: Discussion with Prompt

4:00 PM – Bike Rack Discussion Space
Week Four: May 25-28

No Sessions Schedule for Memorial Day Holiday
Week Five: June 1-4

Monday, June 1:

11:00 AM – Market Opportunity Mondays

Tuesday, June 2:

2:00-4:00 PM – What Organized Markets Can Do for You?
Why and how can buyers expand and improve organized markets to do more deals, create better buying options and accelerate power sector decarbonization? Join us for a two-part session that kicks off with a panelist-led discussion on maximizing the value of wholesale markets. In hour two, attendees choose from breakout groups to participate in topics ranging from creating regional wholesale markets in the West and Southeast, to current issues in existing organized markets.

Speakers: Pat Wood, Principal, Wood3 Resources; Mark Dyson, Principle, Electricity, RMI; Mariah Kennedy, Head of Data Center Energy Policy, Microsoft, Jamey Goldin, Partner, Nelson Mullins; Steve Chriss, Director of Energy Services, Walmart; Caroline Golin, Senior Regulatory Policy Lead, Google; Will Keyser, Partner, K&L Gates

Session Format: Presentation with Breakout & Recap
Thursday, June 4:

11:00 AM – 12:30 PM – Buyer’s Reality Check: Getting Equipped for Successful Transactions

As REBA membership has demonstrated, corporate renewable energy procurement is a key aspect and growing driver of grid decarbonization. While we often hear about the successful renewable energy transactions of large buyers, what we don’t hear about are the transactions that fail to materialize and what happens behind the scenes. The reality is, sometimes deals fall through or don’t go the way we had planned, often due to circumstances beyond our immediate control. This session will focus on lessons learned from experienced buyers and advisors surrounding procurement and contracting, with a goal of setting realistic expectations for first time buyers and equipping them with best practices as they begin the process. McDonald’s Corporation, Royal DSM, and advisor CustomerFirst Renewables will discuss a range of challenges new buyers should be prepared for, including delays and setbacks related to the various complex factors involved in contract negotiation and RE project development, and will share stories of things that have gone wrong in past deals, with advice for how to avoid these downfalls. New buyers will come out of the session equipped with tools and tactics to accelerate the procurement and contracting process, maximizing their chances of closing successful deals and progressing toward a zero-carbon future.

Speakers: Susanne Fratzscher, Director, Business Development, CustomerFirst Renewables; Emma Cox, Manager, North American Sustainability, McDonalds; Harry Coorens, VP Procurement Excellence & Sustainability, Royal DSM

Session Format: Presentation with Breakout & Recap
Monday, June 8:

11:00 AM – Market Opportunity Mondays

Tuesday, June 9:

2:00-4:00 PM – How can community solar help buyers to meet sustainability goals and reduce energy spend?

Why should buyers be looking into Community Solar to meet their clean energy goals? Community Solar allows buyers to subscribe from a local renewable energy source that provides additionality and helps to meet the state's RPS goals. Whether the buyer decides to simply subscribe to a solar project or supplement the subscription with RECs, Community Solar provides the easiest and fastest pathway toward participation in greening the local grid, while also providing buyers with significant utility bill savings.

Speakers: Robert Martine, Director, Origination, Clearway Energy Group; Kevin Gardiner, Director, Community Solar, Clearway Energy Group; Liz Lucente, Lead Energy Program Manager, Target

Session Format: Webinar
Thursday, June 11:

11:00-12:30 PM – What’s Beyond 100%? How are ‘Next Generation’ Corporate Procurement Strategies Emerging?

Is the marketplace ready to meet an evolution from buyer goals centered on 100% renewable purchasing toward strategies centered on consuming zero-carbon generation at more times and more locations? This session will examine the opportunities and barriers to setting and meeting next generation goals, with break-out sessions focused on technologies needed to achieve cost-effective decarbonization, how to think about internal and external hurdles, and what’s needed to evaluate and capture decarbonization impact.

Speakers: Roger Ballentine, President, Green Strategies; Bruce Phillips, Director, The NorthBridge Group

Session Format: Presentation with Breakout & Recap

4:00 PM – Bike Rack Discussion Space
Week Seven: June 15-18

Monday, June 15:
11:00 AM – Market Opportunity Mondays

Tuesday, June 16:
2:00-4:00 PM – Discussion Session Repeat

Thursday, June 18:
11:00 AM – Discussion Session Repeat
4:00 PM – Bike Rack Discussion Space
Monday, June 22:

11:00 AM – Market Opportunity Mondays

Tuesday, June 23:

11:00 AM-12:30 PM - How can a GHG calculation framework be created for the mineral and industrial supply chains?

Discuss how the REBA community can support a universal GHG calculation framework for the mineral and industrial supply chains and highlight the climate impacts from the entire value chain, how a unified framework could support supply chain decarbonization efforts, and what challenges this framework would need to overcome.

Speaker: Paolo Natali, Principal, Rocky Mountain Institute
Session Format: Presentation with Breakout & Recap
Tuesday, June 23 (Continued):

2:00 - 4:00 PM – Transmission, Why Care?

Part I (First Hour): Why is transmission important both to unlocking more renewable energy access in the short-term, and least-cost power sector decarbonization longer-term? How does transmission planning work, how does it matter to buyers, and where do we go from here?

Part II (45 min): Special session after a break to dig into transmission planning bottlenecks and solutions specific to the Midcontinent Independent System Operator (MISO).

Speakers: Jigar Shah, President and Co-Founder, Generate Capital; Rob Gramlich, Executive Director, ACEG; Tyler Stoff, Policy Manager, ACORE; Holly Lahd, Lead Program Manager, Energy & Sustainability, Target; Eric Hoegger, Director, Global Renewable Energy, Cargill

Session Format: Presentation with Breakout & Recap
Week Nine: June 29-July 2

No Sessions Schedule for Fourth of July Holiday
Tuesday, July 7

2:00-3:00 PM - Unlocking Localized Solar VPPAs through Qualified Opportunity Zones

Our session will focus on the utilization of specialized tax incentives (Opportunity Zones) to target localized solar VPPAs in economically distressed communities. OZs are a unique and relatively new investment tool that provides tax benefits for investments made in distressed communities. These tax incentives can be paired with solar development to drive lower PPA rates for ~10-50MW (flexible range) solar farms, making these 'localized' VPPAs price competitive with large-scale projects. Unlocking procurement activity for projects of this size, and through this approach, will have several advantages including an accelerated timeline to COD, reduced risk of nodal price suppression, and enhanced price correlation & hedge performance - in addition to local economic development benefits. In this session, we will explain how this approach can be leveraged to supplement current large-scale renewable energy procurement strategies, and how opportunities to invest directly into such projects can result in improved additionality claims and ROE for corporate buyers.

Speakers: Tommy Greer, Vice President, Insight Sourcing Group; Mike Muoio, Account Manager, Insight Sourcing Group; David Brannen, Account Manager, Insight Sourcing Group

Session Format: Webinar
Thursday, July 9

11:00 AM-12:30 PM – How can a portfolio approach to renewables provide an improved risk profile?

We’re all familiar with the concept that the safest place for your retirement money is a mutual fund, thanks to its ability to reduce risk through diversification. The same concept applies to renewable energy procurement. Instead of entering into one power purchase agreement for a large number of megawatts, corporations can enter into three or more - and diversify the risk. As more corporations look to procure a second or third time, it’s critical for them to consider how their next PPA will affect their entire portfolio of renewable energy investments. In this session, we’ll cover strategies to create a PPA portfolio that will minimize risk and maximize value. Key considerations include: Project location and technology, developer execution and operation risk, matching energy load with renewable investments, scale pricing, and executing PPAs simultaneously.

Speakers: Jason Mortimer, VP Sales, LevelTen Energy; Rob Threlkeld, Global Manager – Sustainable Energy & Supply Reliability, General Motors

Session Format: Discussion with Prompt

4:00 PM – Bike Rack Discussion Space
Monday, July 13:

11:00 AM – Market Opportunity Mondays

Tuesday, July 14

2:00-3:00 PM - Are there Innovative Utility Options for Existing Load?
Join this session to learn about innovative utility projects and programs that bring renewable energy to existing customers across different sectors and sizes. What were key drivers behind these programs? How did customers engage with these utilities?

Speakers: TBD
Session Format: Webinar
Thursday, July 16

11:00 AM-12:00 PM - How can we work with landlords in multi-tenant office buildings to source renewables?

Discuss how the REBA community can motivate and convince landlords in multi-tenant office buildings to source renewables, whether off-site, on-site, and/or through utility products including green tariffs or even CCA options.

Speakers: Erik Hansen, Sustainability Director, Workday
Session Format: Discussion with Prompt

4:00 PM – Bike Rack Discussion Space

Register Now!

- Register for sessions here: [https://cvent.me/0I9RL1](https://cvent.me/0I9RL1) and be sure to register even if there is a waitlist. **Seats will be opened as the session approaches.** Please only register for capped sessions if your intent is to attend, otherwise you are taking someone else’s seat. Repeated absences to capped sessions will result in your remaining registrations being moved to the waitlist.
- This *Schedule at a Glance* is a static document and will not be updated during the summit, for the most up to date information, please go to the event platform: [https://rebaconnect.psa.live](https://rebaconnect.psa.live).
Week Twelve: July 20-23

Monday, July 20:

11:00 AM – Market Opportunity Mondays

Tuesday, July 21

11:00 AM - Discussion Session Repeat

2:00-3:00 PM - How companies can take meaningful supply chain climate actions?
Discuss how to begin to engage with your supply chain partners, sharing best practices and lessons learned to take meaningful supply chain climate actions.

Speakers: Bessma Aljarbou, Program Lead, Clean Energy Program, Apple
Session Format: Discussion with Prompt

Thursday, July 23

11:00 AM - Discussion Session Repeat
Monday, July 27:

11:00 AM – Market Opportunity Mondays

Tuesday, July 28

2:00-3:00 PM - Renewable Energy Accounting: What am I supposed to count?
This session will level-set around different accounting guidance for renewable energy in the grid mix, what buyers can and should say, and what barriers exist to accurately claiming grid mix renewable energy.

Speakers: Maya Kelty, Director, Regulatory Affairs, 3 Degrees
Session Format: Presentation with Breakouts & Recap

Register Now!
• Register for sessions here: https://cvent.me/0I9RL1 and be sure to register even if there is a waitlist. Seats will be opened as the session approaches. Please only register for capped sessions if your intent is to attend, otherwise you are taking someone else’s seat. Repeated absences to capped sessions will result in your remaining registrations being moved to the waitlist.
• This Schedule at a Glance is a static document and will not be updated during the summit, for the most up to date information, please go to the event platform: https://rebaconnect.psav.live.
Thursday, July 30

11:00 AM-12:30 PM - How did Corning decrease their carbon impact as part of their renewable energy journey?

Discuss how Corning increased its low-carbon impact as part of their renewable energy journey by specifying that low embodied carbon solar PV technology be employed in their project. The conversation will include a discussion on the rigorous financial analysis and due diligence employed, an understanding of why some PV panels have lower embodied carbon than others and characterize the magnitude of the additional avoided emissions of a project using low embodied carbon PV panels, and the considerations on project financials.

Speakers: Carly Gaj, Energy & Environmental Project Leader, Corning Incorporated; Phil Rausch, Business Development Manager, Hemlock Semiconductor; Jaafar Rizvi, Director, Client Service, CustomerFirst Renewables

Session Format: Presentation with Breakouts & Recap

4:00 PM – Bike Rack Discussion Space
Week Fourteen: August 3-6

Monday, August 3:

11:00 AM – Market Opportunity Mondays

Tuesday, August 4:

2:00-3:00 PM - How Can Customers Drive Next Gen. Utility Offerings in Regulated Markets?
Join this virtual workshop to understand the landscape of existing utility offerings, best practices for engaging and driving impact, and opportunities to drive next generation utility offerings in regulated markets.

Speakers: TBD
Session Format: Presentation with Breakouts & Recap
Thursday, August 6:

11:00 AM-12:00 PM – How can renewable energy projects positively impact local communities?

Going Green Helps Rural Communities, too! Procuring renewable energy doesn’t just benefit the environment – it positively impacts project host communities in the form of new tax revenue, new jobs, increased local spending, and new income for landowners. Hear directly from Kyle Oldre - Administrator and Emergency Management Director for Rock County, Minnesota – whose county is host to multiple operating renewable energy projects talk about how these projects have benefited his community’s economy and overall well-being. Plus, learn how you can incorporate these social and economic impacts into your overall sustainability goals and achievement evaluation process.

Speakers: Kyle Oldre, Administrator, Rock County Administrator, Emergency Management Director

Session Format: Webinar

4:00 PM – Bike Rack Discussion Space
Monday, August 10:

11:00 AM – Market Opportunity Mondays

Tuesday, August 11:

11:00 AM-12:00 PM - What are the issues and approaches to allowing project substitution in contracts?

With multiple projects in various stages of development, often within the same region and with similar production profiles, sponsors have increasingly sought the optionality to modify or otherwise assign executed virtual power purchase agreements to other projects that have either reached a more advanced stage of development or that otherwise have more advantageous economics. While this can benefit both the sponsor and the buyer, it also poses some risk around the expected production profile and project performance. In negotiating for this option to be contained in the PPA itself, buyers and sellers must ensure the terms and conditions of any such assignment are clear, including the time frame for exercising the option and the conditions under which a buyer is willing to accept a substitute project. This session would discuss various “project substitution” approaches and some of the issues to be aware of.

Speakers: Joshua L. Belcher, Counsel, Eversheds Sutherland (US) LLP
Session Format: Discussion with Prompt
Week Fifteen: August 10-13

Thursday, August 13:

11:00 AM-12:00 PM – Discussion Session

4:00 PM – Bike Rack Discussion Space

Register Now!

• Register for sessions here: https://cvent.me/0I9RL1 and be sure to register even if there is a waitlist. Seats will be opened as the session approaches. Please only register for capped sessions if your intent is to attend, otherwise you are taking someone else's seat. Repeated absences to capped sessions will result in your remaining registrations being moved to the waitlist.

• This Schedule at a Glance is a static document and will not be updated during the summit, for the most up to date information, please go to the event platform: https://rebaconnect.psa.vlive.
Week Sixteen: August 17-20

Monday, August 17:

11:00 AM – Market Opportunity Mondays
Tuesday, August 18:

2:00-3:00 PM - What are the metrics and tools for assessing environmental and social impacts of RE projects?

We purchase renewable energy (RE) to improve the state of the world. To ensure we're staying true to that goal, we must make our RE purchasing decisions on more than just financial criteria. In this session Salesforce will provide an overview of their approach and the criteria they assess when selecting renewable energy projects. Three of the experts they look to inform their purchases will share details about the criteria they specialize in, why the criteria matter and how to use it in evaluate a RE project in a typical RFP process. Patricia from Green Electronics Council will discuss life cycle sustainability considerations for selecting installed equipment. Bruce McKenney from The Nature Conservancy will discuss how to minimize land-use impacts to lands and wildlife habitat. Henry Richardson from WattTime will discuss how to quantify the avoided emissions and air quality benefits from individual RE projects.

Speakers: Max Scher, Head of Clean Energy and Carbon Programs, Salesforce; Bruce McKenney, Director for Strategic Initiatives, Energy & Infrastructure, The Nature Conservancy; Henry Richardson, Senior Analyst, WattTime; Patricia Dillon, Senior Director, Criteria and Category Development, Green Electronics Council

Session Format: Webinar
Thursday, August 20:

11:00 AM-12:00 PM – Discussion Session Repeat

4:00 PM – Bike Rack Discussion Space

Monday, August 24:

11:00 AM – Market Opportunity Mondays

Tuesday, August 25:

11:00 AM – 12:00 PM - How to meet renewable energy goals when buying renewables in Asia-Pacific and current challenges?
Discuss how REBA community members are meeting renewable energy and climate goals in Asia-Pacific. What reporting challenges are companies facing? And how can REBA engage other NGOs in setting rules on reporting that take into account the complex regulatory landscapes in countries like Singapore, Japan and China while allowing incremental progress as regulatory processes evolve.

Speakers: Jennifer Ruch, Director, Sustainability, Equinix; Bruce Frandsen, Director – Global Renewable Energy and Cleantech, Equinix

Session Format: Discussion with Prompt
Tuesday, August 25 Continued:

2:00 PM – 3:30 PM - There is excitement around battery energy storage for C&I use, what’s right for your organization?

Join this virtual workshop to hear the latest on the state of the battery energy storage landscape and hear case studies of emerging and market-ready technology solutions NREL has worked with through our technology incubation programs. This is also a chance to learn how NREL can help your organization identify, evaluate and pilot new technology solutions suited to your needs.

**Speaker**: Kate Moore, Assistant Director, Innovation & Entrepreneurship Center, NREL

**Session Format**: Presentation with Breakouts & Recap
